SUMMARY

Final-year B.Tech student in Bio Science and Engineering at NIT Calicut, seeking full-time opportunities in the tech industry. Enthusiastic about applying my skills to real-world problems, collaborating with professionals, and executing impactful projects. Passionate about building problem-solving systems, and driven to grow as an engineer while making a positive impact.

EDUCATION

National Institute of Technology, Calicut 2023 - 2027

B.Tech in Bio Science and Engineering | CGPA: 7.43/10 | Kerala, India

Narayan Jr. College, Nellore 2021 - 2023

Class XII | 94.6% | Andhra Pradesh, India

Champion High School, Sullurpeta 2020 - 2021

Class X | 100.0% | Andhra Pradesh, India

TECHNICAL SKILLS

Languages: Java, Python

Backend Frameworks: Spring Boot, Node.js, Express.js

Web Development: HTML, CSS, JavaScript, React.js, Next.js, REST APIs

Security: JWT Authentication

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Vercel, Render, Postman

EXPERIENCE

SUNTECH — AI Full-Stack Developer (Intern) May 2026 - July 2026

- Worked on AI full-stack projects, building and implementing end-to-end web services for client companies and businesses
- Collaborated with the engineering team to design, develop, and deploy full-stack solutions using modern AI-integrated tech stacks

PROJECTS

Secure Splitter with Fraud Detection July 2026

- Built a secure expense-splitting app with a heap-based debt simplification algorithm to minimize settlement transactions between group members
- Implemented a rule-based fraud detection engine (threshold, velocity, and cycle detection) with JWT authentication and REST APIs to flag suspicious transactions in real time
- Core Framework: Java, Spring Boot, Spring Data JPA
- Security: Spring Security, JWT Authentication, BCrypt Password Hashing, Role-Based Access Control
- Database: MySQL, Normalized Relational Schema Design, Indexed Query Optimization, Complex Aggregation Queries
- Testing & Tools: Postman, JUnit, Git, REST API Design

SIGMA GPT — AI Chatbot Platform (ChatGPT Clone) May 2026

- Built a full-stack AI chatbot platform with secure user authentication, persistent chat history, and real-time conversational responses
- Integrated the Groq API (Llama 3.3 70B Versatile) with MongoDB Atlas to deliver low-latency AI responses and reliable chat storage for multiple concurrent users
- Deployed a production build on Vercel using React.js (Vite) on the frontend and Node.js/Express.js on the backend

Study Focus — Chrome Extension with Cloud Sync April 2026

- Built a Chrome Extension combining a website blocker, Pomodoro timer, and study session tracker behind a personalized login dashboard
- Implemented cloud sync via a REST API and MongoDB so user preferences, session history, and settings stay consistent across devices
- Designed the JSON-based data layer connecting the Chrome Extensions API frontend to the backend sync service

LEADERSHIP & CAMPUS INVOLVEMENT

- Active member of the AI Club — collaborate on exploring and building AI/ML applications with peers
- Demonstrated team collaboration and leadership skills through cross-functional project work
